Year 2: Changing Me

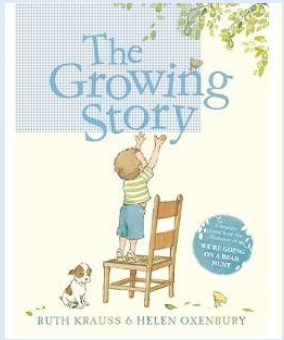
Subject Specific Vocabulary	
life cycles	All animals including humans grow throughout their lives from a baby to an adult. this is a life cycle.
growing up	As you get older, your body changes. this is growing up.
private	Some parts of our bodies are private, if someone asks to see / touch we tell them no.

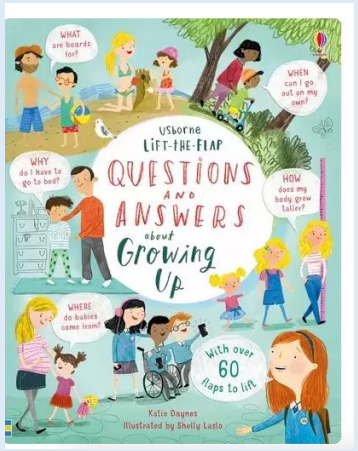
Vocabulary for the unit
baby, toddler, child, teenager, adult, private, male, female, vagina, penis, testicles, vulva, anus, private

Questions for family learning

- How have you changed in since you were a baby?
- How will you change in the next 5 years? What about the next 20 years?
- Which parts are your private parts? Who is allowed to see them?

Interesting Books:

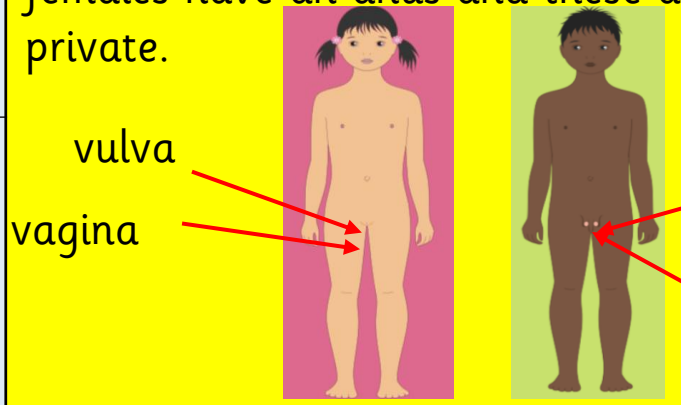




s

I can accurately position myself on a timeline from baby from elderly person and give an example of how I have changed since I was born.

I know males have a penis and testicles and females have a vulva and vagina. Males and females have an anus and these are all private.



I know that if I am unhappy with a physical touch I must tell a trusted adult.
