Learning to make the world a better place.

COLLIS Primary School

care

We are a school that relentlessly promotes empathy and wellbeing. We are a place where lots of good things happen.We give children the best time of their lives whilst developing their character for future success.

challenge

We work to be the best we can. We have an academic environment that encourages and inspires. We are a springboard to help children succeed in life.

courage

We are resilient and keep going even when we are stuck, and we encourage the children to do the same. We inspire confidence and independence. We do this by preparing and equipping our children for now and the future.

collaboration

We help each other become betters learners within our learning community; through learning together we can achieve more.

creativity

We grow dreams. We enable children to find their true passions. We teach children how to think, not what to think. We help them to understand next steps in their learning journey.
