

National Child Measurement Programme

2024 summary of results for 102903 - Collis Primary School

These results combine data from 2019/20, 2021/22 and 2022/23 (where available) to give a sample large enough to produce reliable estimates of the proportion of children who are overweight or living with obesity for your school.

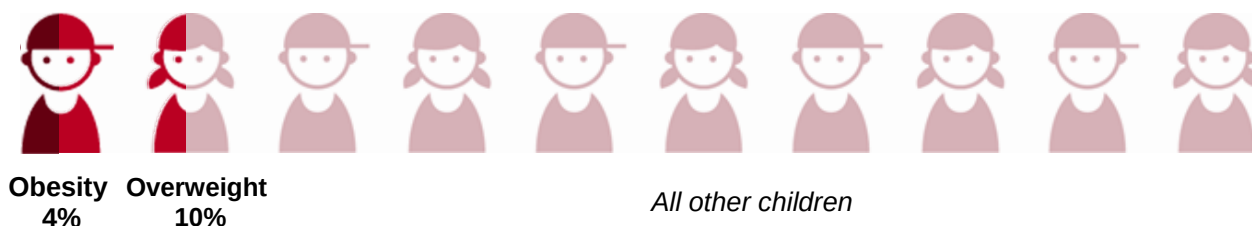

Nationally, schools achieve an average participation rate of 95% in Reception and 94% in Year 6.

In your school **90 to 95% in Reception year** and **above 95% in Year 6** were measured.

High participation rates (over 90%) ensure that the estimates of overweight or obesity in your school are reliable. Participation rates below 90% may result in unreliable estimates.

Proportion of **Reception** children in your school who were overweight or living with obesity

NCMP 2019/20, 2021/22, and 2022/23 combined

The proportion of Reception children who were overweight or living with obesity (14%) is lower than the England proportion (22%). 16% of Reception children were overweight or living with obesity in Richmond upon Thames local authority.

Proportion of **Year 6** children in your school who were overweight or living with obesity

NCMP 2019/20, 2021/22, and 2022/23 combined

The proportion of Year 6 children who were overweight or living with obesity (18%) is lower than the England proportion (34%). 25% of Year 6 children were overweight or living with obesity in Richmond upon Thames local authority.

In any population of children of all ages, it would be expected that 10% would be overweight and a further 5% living with obesity. However current levels across England are far higher.
