Year 5: Living things and their habitats Knowledge Map

Subject Specific Vocabulary	
puberty	The time during adolescence when the body starts to change from a child into an adult. This includes growing taller, changes in voice, and body development.
gestation	The time a baby spends growing inside its mother before it is born. This usually lasts about 9 months.
foetus	A baby growing inside the womb before it is born. After about 8 weeks of growing, an unborn baby is called a foetus.
baby	A very young child, usually from birth to 1 year old.
toddler	A young child, around 1 to 3 years old, learning to walk and talk.
teenager	A person between 13 and 19 years old. Teenagers are growing and changing quickly.
adult	A fully grown person who may work, live on their own, and sometimes have children of their own.
