ASSEMBLY

CELEBRATING DIFFERENCES!

Learning to make the world a better place.

Care

Challenge

Collaboration

Courage

Creativity

The 4 Bs of Behaviour

The 4 Bs of Behaviour

COLLIS Primary School

Be Responsible

- Whisper when walking round the school
- Look after property, resources and the school environment
- Put rubbish in the correct bin
- Keep the classroom tidy

Be a Learner

- Try your best
- Be a good learning partner - face the speaker, take turns to talk and listen
- Use an appropriate voice (volume)
- Concentrate and focus
- Stop, look and listen when asked
- Watch the person who is talking

Be Respectful

- Listen to adults and children
- Put your hand up if you have something to say
- Make eye contact when speaking to someone
- Enter assemblies in silence
- Allow adults through doors first

Be Safe

- Walk in single file on the left around the school
- Hold doors open for others
- Keep cloakrooms tidy
- Use the toilets sensibly and wash your hands

I am special and unique

Diversity

I am special and unique

LION
GOES
HERE

Imagine how strange it would be if you came to school one morning and everyone looked exactly the same – like robots or Cybermen from 'Doctor Who'. You wouldn't be able to tell who your friend was and who was your teacher.

Or imagine if everyone liked the same things and when you went to the library you all started fighting over who was going to take out the same book – or if everyone wanted to play in goal in a football game.

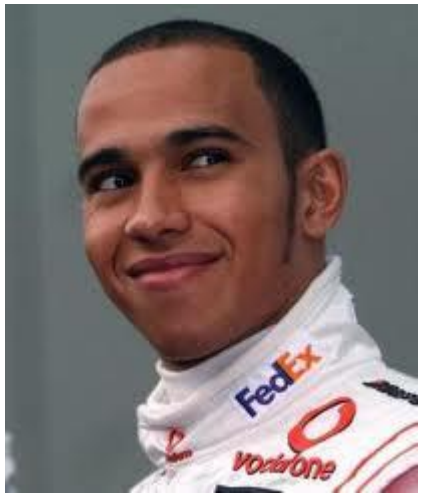

Fortunately, we're all different. We might want to be a little more like someone else – a hero or someone we admire – but basically we are who we are.

Each one of us is different; we are unique, even if we look a little similar to a brother or sister or share likes and dislikes with our friends.

The same thing is true wherever we look in our universe. Some of you may have seen those TV programmes about wildlife. Experts who track animals like leopards, cheetahs, giraffes or zebras know each individual animal. They may look all the same to us, but the experts know that, for example, one particular cheetah has a big spot on her left ear. Another may have an unusual shaped dot on her tail. Each big cat is noticeably different from the next, when you know what to look for.

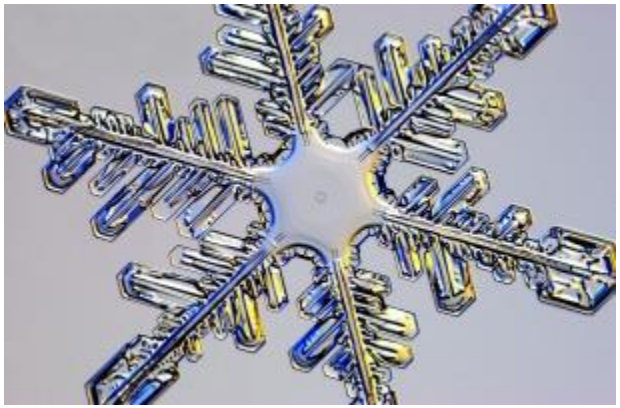

And this is true everywhere you look. I'm sure you know the staggering fact that each snowflake has its own individual pattern. What looks to us like lots of white, wet bits all mixing together is in fact millions of different geometric patterns. Each snowflake is unique.

Did you know?

Every single one of us
has a unique fingerprint.
No one has the same.
Each one is unique,
different and special.

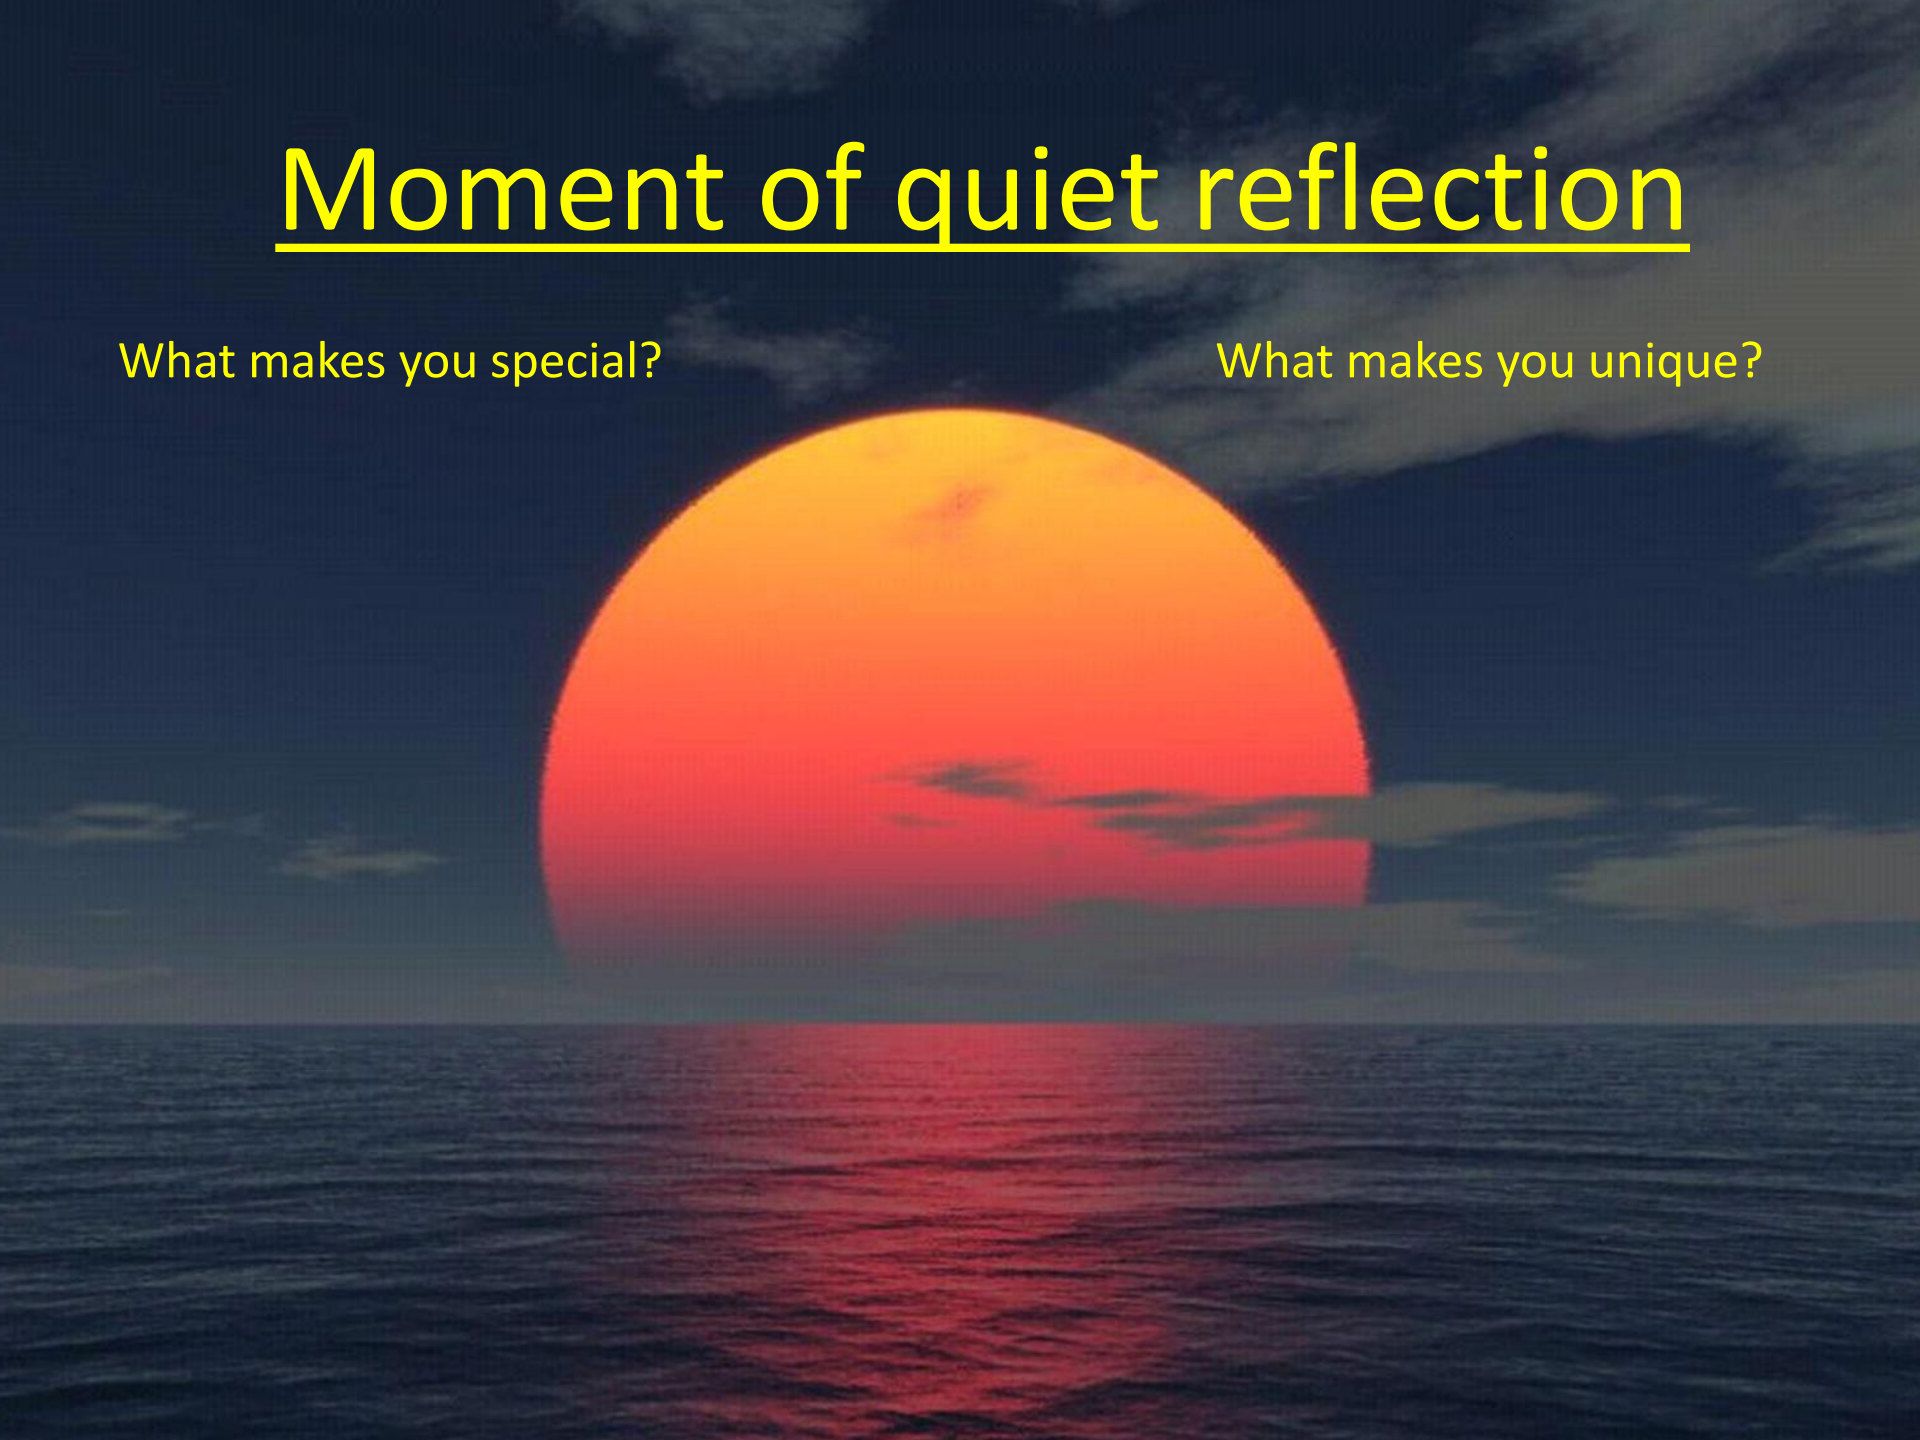

Moment of quiet reflection

What makes you special?

What makes you unique?

Reflection

Thank you that you have made me.
Thank you that I am unique; that even my fingerprints are different;
Thank you for the things I am good at and enjoy doing. Thank you for my family; for those who made me as I am; Thank you that I am like my friends, but different. Thank you that I live in a country where we are allowed to be who we are. Help us to work together to make this last.

Butterflies don't know the color of their wings, but human eyes know how beautiful it is. Likewise, you don't know how good you are, but others can see that you are special.

Please Keep the school
