Year 2 What can we learn from the globe about our world?

Subject Specific Vocabulary	
continent	A large solid area of land. North America, South America, Europe, Asia, Africa, Antarctica and Australasia.
equator	An imaginary line around the middle of the Earth. It is halfway between the North Pole and the South Pole.
ocean	A huge body of salt water. Pacific Ocean, Atlantic Ocean, Southern Ocean, Arctic Ocean and Indian Ocean.
Arctic	An area made up of icy glaciers, sea ice on the Arctic Ocean, and flat plains covered in ice and snow with temperatures of minus -34°C in the winter (North Pole).
Antarctic	A vast ice-covered landmass surrounded by sea (unlike the Arctic, which is an ice-covered ocean surrounded by land).
adapt	The process of changing so an animal or plant can become better suited to its surrounding environment.
habitat	A place where an animal or plant lives. It provides the animal or plant with food, water, air and shelter.

Sticky Knowledge

Know and locate the seven continents of the world which are: North America, South America, Europe, Asia, Africa, Antarctica and Australasia.

Know and locate the five oceans of the world which are: Pacific Ocean, Atlantic Ocean, Southern Ocean, Arctic Ocean and Indian Ocean.

Locate on a map the North Pole, South Pole and the Equator.

Know that places are usually hot at the equator and the North and South Pole are the coldest places on earth (Arctic and Antarctic regions).

North Pole

Equator
